

Yonkers Set to Join Sustainable Westchester's *Westchester Power Community Energy Program*

Westchester Power serves 115,000+ residents in 28 Westchester municipalities who have come together to address climate change through their electricity choice. Yonkers is set to join this **fixed-rate, 100% renewable energy program** that enables the city to negotiate a clean energy supply, help “green” the electricity grid and work toward creating a cleaner, healthier & more resilient City!

Why Westchester Power?

- Allows local governments like Yonkers to procure a renewable energy supply and other services on behalf of their residents and small businesses
- The program supplier is selected from qualified Energy Service Companies (ESCOs)
- **Fixed rates:** consistent pricing each month, resulting in cost control and insurance against unpredictable utility electricity pricing
- **100% EMISSION-FREE electricity**
- You **CAN OPT OUT at ANY TIME** without penalties
- Con Edison continues to be responsible for your delivery, billing, maintenance & emergency services

NOTE: If you have chosen your own Energy Service Company (ESCO), you may join the program after cancelling with your ESCO - be sure to check that you will not incur any cancellation fees. If you are on the Home Energy Assistance Program (HEAP), you are not eligible at this time.

DID YOU KNOW?

Burning fossil fuels for energy accounts for 75% of our greenhouse gas emissions.

MAYOR MIKE SPANO
